

* BREEAM UK New Construction 2018.

✓ What will be covered on the day?

- ⚙ Review how modern boiler design has developed in recent years.
- ⚙ Consider how these developments may influence system design.
- ⚙ Boiler design, including heat exchanger, burner and controls.
- ⚙ Energy saving applications, explanation of various schematics plus practical solutions.
- ⚙ Principles of system design and condensing theory.

✓ Who should be attending?

- ⚙ The seminar is suitable for professionals from graduate to senior level, with either mechanical or electrical backgrounds.
- ⚙ It would also benefit consultants, facility managers, procurement managers and local/health authority staff who are responsible for specifying heating and hot water equipment.

✓ How long is the CPD?

- ⚙ The presentation lasts from 45 minutes to 1 hour.

✓ What are the benefits of attending ATAG Commercial CPD?

- ⚙ Increase your knowledge of condensing boiler and system design.
- ⚙ Learn the benefits of stainless steel heat exchangers.
- ⚙ Better understand burner designs and the applications for each.
- ⚙ Courses held all year round.
- ⚙ Course summary provided.
- ⚙ All ATAG Commercial CPDs count towards a CIBSE member's annual CPD hours.
- ⚙ You will receive a certificate of attendance and your self-assessment form for future reading.

Book your CIBSE approved CPD today!
